

Protect Yourself from Mosquitoes and Deer Ticks

Mosquitoes and deer ticks are common at Wisconsin Lions Camp. Mosquitoes can carry disease and deer ticks frequently carry multiple diseases, including Lyme disease. Please do daily tick checks of your skin and clothing to reduce the potential of contracting any of these diseases. You can also tuck your pants into your socks! This can prevent the sweet little critters from crawling up under your pants.

There are many toxic and natural products available on the market to help protect you/your family from ticks and mosquitoes; please use what works best for you.

**Deer tick - blacklegged tick
(Not actual size)**
